

# Do More With LEss

ALMAGARD HAS STAYING POWER FOR  
ULTIMATE LONG-LASTING BEARING PROTECTION

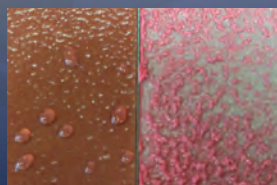

LE offers  
a wide range  
of enhanced industrial  
greases to meet the  
needs of any  
challenging application.

When it comes to protecting your expensive equipment, why cut corners? For the past five decades, the go-to grease for extended service and severe duty applications around the world has been LE's high-performance **Almagard® Vari-Purpose Lubricant**, fortified with LE's proprietary Almasol® and Quinplex® additives. Water, heat and high impact won't prevent Almagard from doing its job. Extremely tacky and water-resistant, Almagard also features superior oxidation resistance, mechanical stability and extreme pressure properties. Find out what legions of satisfied customers already know: Almagard is the right choice for ultimate bearing protection.

#### Very tacky

Almagard clings tenaciously to metal, and will not pound out or sling off, even in extreme conditions.

#### Highly resistant to water

Almagard (left) stays in place, while the competitor's grease (right) washes away.

Ready to experience **LEss** downtime and longer lasting equipment?
