

Problem Solved

CALCIUM SULFONATE COMPLEX GREASE OUTPERFORMS ORDINARY GREASES

Correctly identify grease 100% of the time with LE's Clear Grease Guns, a great reliability companion for LE's new Monocal™ GP Grease.

Problem: Ordinary greases fail to adequately lubricate equipment, especially when high temps, heavy loads and water are present.

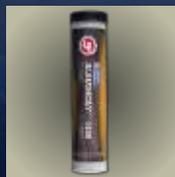

Solution: LE's new Monocal™ GP Grease features high quality base oil, calcium sulfonate complex thickener and Monolec®, LE's proprietary wear-reducing additive. This synergistic combination imparts a high dropping point, exceptional EP characteristics, superior mechanical stability, and water resistance – everything you need to protect and extend the life of your equipment.

NLGI 2, perfect for most industrial applications

Very high dropping point & exceptional inherent EP characteristics

Also part of LE's calcium sulfonate family, Almamol HD Grease with 5% moly is perfect for construction, mining, road-building, etc.

Drop by www.LElubricants.com/noria9.html today and fill out a form to receive a complimentary tube of Monocal™ GP Grease. While you're online, be sure to browse our site to learn more about LE's full line of industrial lubricants and how we can help lower your overall costs and keep your equipment running.
