

Increase ROI with Lube Reliability Program

Dramatically *increase* ROI by *decreasing*: downtime; lubricant expenditures; equipment repairs, rebuilds and replacements; labor costs; and electric energy use. You'll be an Uptime Hero with LE by your side.

Our lubrication reliability program – tailored to your needs – includes a plant-wide assessment; use of high-performance NSF H1 food grade greases, oils and sprays; and the incorporation of reliability solutions such as single-point lubricators, clear grease guns, desiccant breathers, oil sight glasses, lubricant identification, and organized lube room with clean, efficient storage and handling containers.
