## Lubrication Best Practices Enhance Mill Uptime

How do we do it? By implementing these solutions:

- Xpert™ Equipment Assessment
- Xport™ Automatic Lube Systems
- High-Temperature Grease

We help our pellet mill customers achieve results: dramatically increasing mill uptime, significantly cutting grease consumption, saving thousands of dollars per year on grease, extending roll and quill bearing life, and saving on the cost of rebuilds.

With our solutions, you too can reduce grease consumption and extend the life of your bearings. Find out more at [www.l Lubricants.com/pellet-mill-lubrication.html](http://www.l Lubricants.com/pellet-mill-lubrication.html) and then contact us to get started. All of these solutions are available on the LE website or through our local lubrication consultants. Let's get started today!
