

Viper Rope Cleaner (VRC) Selection Guide

Viper Rope Cleaners enable the removal of contamination or built up old lubricant from the wire rope prior to lubrication, improving the effectiveness of the lubrication process via the Viper Wire Rope Lubricator.

Pictured below, we can see the Viper Wire Cleaner in place as the rope enters the Viper Mk II WRL.

It is recommended that all ropes be physically measured prior to selecting and ordering the VRC, as ropes size may vary in service.

Right Lay – Clockwise Rotation

Left Lay – Counter Clockwise Rotation

Available for 6 and 8 strand ropes in a wide range of sizes, the following tables allow for the quick and easy selection of the correct VRC to suit your specific requirements.
