

Product Information

Xport™ Lubricant Application

Xport™ SPL App

Application-oriented calculation tool for optimized lubrication

- Use app on mobile device or computer as platform for lubrication with Xport SPLs and LE grease.
- Calculates required lubricant amount and discharge setting for your lubrication system based on entry of existing operating conditions.
- Can easily be installed on all common iOS and Android mobile devices. Browser version is also available. *

* Download and use of software is free of charge. Online costs by your Internet service provider must be paid by user.

Xport™ SPL App

3 Simple Steps to Optimized Lubrication

1) Data Entry

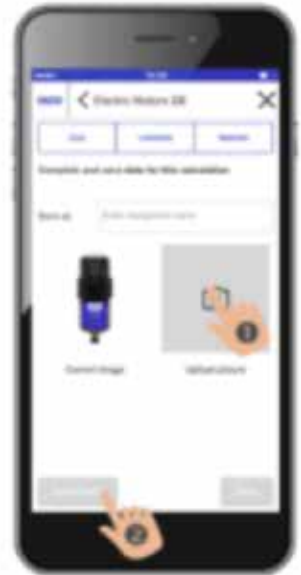

Calculation is based on entry of bearing or application data.

2) Recommendation

Software recommends most suitable lubrication system, ideal lubricant and right discharge period.

3) Selection / Solution

Take picture of application and email saved calculation results.
