

Customer Testimonial

Monolec® Gear Lubricant (703)

N & L Transportation, Inc. – Moscow, Penn.

Truck Differentials

- Reduced operating temperatures by 18 degrees
- Eliminated rear differential gearbox failures

Customer Profile

N & L Transportation is a heavy-haul trucking company covering the entire United States. It also maintains a water truck fleet for the gas drilling industry.

Application

Differentials in the fleet of Kenworth trucks

Challenge

Using a commercial grade synthetic gear oil, the company's truck differentials were running hot and experiencing failures.

LE Solution

Kevin Chapin, LE lubrication consultant, recommended LE's Monolec® Gear Oil (703), which is a multiviscosity EP gear oil that exceeds the demanding requirements of all types of differentials in over-the-road and off-highway equipment. It contains Monolec, LE's exclusive wear-reducing additive.

Results

Since converting from a full synthetic to LE's non-synthetic Monolec 703, temperatures have dropped 18 degrees and there haven't been any more rear differential gearbox failures.

N & L's Jeff Burton, said, "It's nice to have a product that saves us so much time and money, as well as knowing it keeps our fleet on the road."

Other LE Products Used

- Almagard® Vari-Purpose Lubricant (3752)
- Almasol® Pure Mineral Gear Lubricant (401)
- BTU+ Total Treat (2410)
- BTU+ Power Supplement & Cleaner (2420)
- Duolec® Vari-Purpose Gear Lubricant (1604)

- Monolec® Hydraulic Oil (6110)
- Monolec® Power Fluid (7500)
- Monolec Ultra® Engine Oil (8800)

Thank you to Jeff Burton of N & L, and to Kevin Chapin, LE lubrication consultant (pictured), for providing the information used in this report.
