607 ALMASOL® VARI-PURPOSE GEAR LUBRICANT
1150 TRANS-ALL EHP AUTOMATIC TRANSMISSION FLUID

Trackmaster Fabricators, Inc., Newark, TX, DRM Racing Team, Santa Barbara, CA
SIC 7948 Racing, including track operation

Trackmaster Fabricators Inc, and DRM Racing Team are annually at the various race week events at the Bonneville Salt Flats and believe that using LE's 607 ALMASOL® Vari-Purpose Gear Lubricant and 1150 TRANS-ALL EHP Automatic Transmission Fluid in their race cars enables them to continue to set records.

Trackmaster Fabricators have set 13 land speed records over 300 mph at Bonneville over the past several years. In the process George Fields, President of Trackmaster Fabricators, introduced Fred Dannenfelzer of DRM Racing Team to LE products. Fred is a veteran dry lakes racer setting records over 300 mph at Bonneville and El Mirage. He is the current Vice President of the South California Timing Association, which is comprised of 12 racing clubs.

During the World Finals at Bonneville in October 2004, with the management of Trackmaster Fabricators and DRM Racing, Betty Burkland set out to upgrade her license and get in the 200+ mph club. Betty comes from a serious racing family and was in Bonneville for fun since the 450 mph streamliner of her husband was not quite ready. Betty set a record at 263.877 mph in the E Blow n Fuel Competition Coupe Class, which she attributes to the support of her team and the use of superior products of Lubrication Engineers, Inc. in the differential and transmission.

November 5, 2003

Dear George,

Thank you for recommending Lubrication Engineers Oil. I have been using it in the rear end of the race car and it has helped immensely with life of the quick change gears. I also use their ATF in the transmissions of both the race car and push/tow truck and the 15w40 in the engine of the truck with great results.

Thanks again,

Fred Dannenfelzer
DRM Racing car #44
