## L-X<sup>®</sup> Heavy-Duty Chemical Supplement (2300)

*Asplundh Tree Company – Nashville, Tenn.*

### *GMC Boom Trucks*

- *Improved power*

#### *Customer Profile*

Asplundh Tree Company is one of the world's most well known tree service companies. Their trademark orange trucks and equipment are widely recognized all over the country. They trim trees in Nashville for Nashville Electric Service on a contract basis.

#### *Application*

GMC Boom Trucks are used to carry the limbs, shavings and chips from trees cut away from power lines, gathered after storm damage and from clearing of land under development.

#### *Challenge*

One particular boom/bucket truck, which tows a 6,000+ pound chipper unit, was not running very well. The truck had very limited power and was extremely sluggish when going up hills and when trying to accelerate.

#### *LE Solution*

The local LE lubrication consultant recommended L-X<sup>®</sup> Heavy-Duty Chemical Supplement (2300), which is a fuel supplement for internal combustion engines. It cleans internal engine parts, prevents carbon and gum deposits on rings, plugs, injectors, pistons, valves, carburetors and PCV valves. L-X 2300 reduces friction, wear and fuel consumption.

#### *Results*

The same boom/bucket truck previously mentioned was having problems climbing a long steep hill on one of Nashville's streets while on the way to a jobsite. On two different occasions, a local towing company was called to tow the truck to the top of the hill. This cost quite a bit of downtime for the truck and the crew. Henry Tomlin, general superintendent, ordered L-X 2300

and gave a bottle of it to the truck driver, John Stevens, to pour in the gas tank. The improvement noticed was almost immediate. The same truck can now climb the same hill under it's own power, while still towing the 6,000+ pound chipper. The power improvement was almost unbelievable. John came back at the end of the day and said, "Boss, I don't know what that bottle of stuff you gave me to put in the truck was, but it sure did work. It busted something loose in the fuel system and the power improvement is unreal!" Several of the other drivers and crewmembers have commented on the improvements noticed. Henry Tomlin said, "tell anybody to call me and I'll tell 'em how well the stuff works. That is the best stuff I've ever used as far as a fuel injector cleaner goes."

#### **Other Products Used**

- BTU<sup>+</sup> Power Supplement & Cleaner (2420) is used in the diesel chipper units and does a fantastic job.

*Thank you to Henry Tomlin, general superintendent, John Stevens, crew foreman and truck driver, and to Chris Nowlen, LE lubrication consultant (pictured), for providing the information used in this report.*
