**ATCO BUILDING MATERIALS, Las Vegas, NV**  
**Forklifts, Delivery & Over-The Road Trucks**  
**SIC 5032 Brick, Stone & Related Construction Materials**

**LE's 7500 MONOLEC POWER FLUID IS FORMULATED TO GIVE MAXIMUM OPERATING RESULTS, EVEN UNDER THE MOST SEVERE FIELD CONDITIONS**

**CUSTOMER PROFILE**

ATCO Building Materials supplies material for the construction industry in Eastern Nevada and Utah. They have been an LE customer since 1997.

**APPLICATION**

ATCO Building Materials uses 12 Champion Forklifts, a Ford ZF 5-Speed, Allison and various other automatic transmissions. This equipment is used 7 days a week, 10 hours a day and is under full load 90% of the time loading and unloading materials. It endures extreme summer heat, constant airborne dust and a lot of water contamination.

**AREA OF INTEREST**

There were no current problems with the competitive products being used. However, because on-time delivery is required, ATCO Building Materials was looking for better performing products and product consolidation.

**LE SOLUTION**

The local LE Lubrication Consultant recommended to Brian Edwards, Chief Mechanic, LE's 7500 MONOLEC Power Fluid. **LE's 7500 is formulated for combination gear-hydraulic systems and certain hydraulic transmissions and converters. It is non-foaming, rejects water and contains MONOLEC, LE's exclusive wear-reducing additive.**

**CUSTOMER COST SAVINGS**

After showing Brian Edwards the water separation test, LE's Lubrication Consultant convinced the customer to try it. LE's 7500 MONOLEC Power Fluid performed above ATCO Building Materials expectations. Now, LE's 7500 is the only product they are using in their equipment. **The forklifts operate more smoothly with no mid-day fading and all truck transmissions are running cooler and shifting is more responsive even under full loads.**

Brian Edwards states, "LE makes an outstanding product and I recommend it to anyone with rolling stock. They won't be disappointed."

*We would like to thank Brian Edwards, Chief Mechanic and LE Lubrication Consultant Hank Cordes (pictured) for the information provided to prepare this report.*

Based on actual user experience. Individual results may vary. Product used not intended to supersede manufacturer's specifications.
