

8800 MONOLEC ULTRA[®] Engine Oil

Barbie Graham - Dowagiac, MI

2001 Toyota Sequoia • SIC 8811 Private Household

“I currently have over 300,000 miles and it is still running and performing like new. I know it is because of LE products.”

- Barbie Graham, Proud LE User

CUSTOMER PROFILE

Barbie Graham has been using LE products for 10 years. She travels many miles annually for her occupation.

APPLICATION

Barbie Graham drives a 2001 Toyota Sequoia with a V-8 4.7 liter engine. She uses this vehicle for work and accumulates over 100,000 miles a year.

AREA OF INTEREST

The vehicle began to have very short oil drain intervals due to the recommended 5W-30. The vehicle was purchased new and high-quality care of the vehicle was important to Barbie.

LE SOLUTION

Barbie decided to change the oil to LE's 8800 MONOLEC ULTRA[®] Engine Oil. LE's 8800 is a long-drain SAE 15W-40 engine oil designed for year-round extended drain service in diesel and gasoline engines. It provides the most desired features and benefits for heavy-duty service. Through a unique formulation available only from Lubrication Engineers, LE's 8800 offers exceptional service.

CUSTOMER COST SAVINGS

Since converting to LE's 8800 the vehicle has had no leaks or other engine related problems. With the use of LE's 8800 and oil analysis, the oil is now changed

every 25,000 miles and the filter every 5,000.

Barbie Graham, *“My engine is well protected with the proprietary additives LE uses and I sleep well knowing my vehicle will start every day. The only thing I have ever had to do to this vehicle is change the fluids. I currently have over 300,000 miles and it is still running and performing like new. I know it is because of LE products.”*

OTHER PRODUCTS USED

- 9919 SYNOLEC[®] All-Climate Gear Lubricant—used in differentials and transfer cases
- 7500 MONOLEC[®] Power Fluid—used in the transmission
- 3751 ALMAGARD[®] Vari-Purpose Lubricant—used in all grease points
