

Customer Testimonial

Syntemp® Synthetic Lubricant (9102)

United Paper Converting – Miami, Fla.

Various Equipment

- Equipment operated smoother
- Quieter work environment

Customer Profile

United Paper Converting located in Miami, Florida, is a subsidiary of Pedro Ramirez Paper Agency, Inc. This facility is dedicated to the converting of paper and paperboard for the printing industry.

Application

The manufacturing plant incorporates a 109" Cameron brand slitter/rewinder with shear cut blades that can rewind jumbo rolls while making longitudinal slits so as to produce the desired roll widths. United Paper also has one Maxon 67" sheeter and a Hamblet 73" sheeter as well as Polar brand guillotine trimmers. The guillotine trimmers feeds sheeted paper upon an air cushioned table for final uniform trimming of all four sides of the sheet and final placement on skids or in boxes. The plant also uses four Clark 10,000 lb forklifts and a Quincy 10 hp air compressor.

Challenge

The local LE lubrication consultant stopped by this facility and was invited by Peter Ramirez, sales manager, to perform a Lubrication Survey of the plant. The LE consultant immediately noticed that none of the numerous chains driving these expensive pieces of equipment were being lubricated.

LE Solution

The LE consultant recommended Syntemp® Synthetic Lubricant (9102), which is a unique, heavy duty, high temperature spray lubricant designed for open gears, chains, cables, sealed bearings and slides—or any "tight"

area where grease lubrication can be best accomplished by the spray method. Its superior lubricating qualities reduce wear, friction and heat far more effectively than ordinary greases.

Results

After utilizing Syntemp 9102 throughout the facility, it was apparent the equipment operated much smoother and the plant became a much quieter work environment.

Peter Ramirez stated, "It is apparent that with the age of our equipment it is Lubrication Engineers products that have prolonged the life of the equipment and helps us avoid costly repair issues."

Other Products Used

- Almaplex® Industrial Lubricant (1275)
- Monolec® Hydraulic Oil (6110)
- Monolec® R & O Compressor / Turbine Oil (6404)
- Monolec® Synthetic Industrial Lubricant (9460)

Thank you to Peter Ramirez, sales manager, and to the local LE lubrication consultant, for providing the information used in this report.
